# Geo-conquesting

---

- Mobile platforms have enabled a new form of competitive targeting called geo-conquesting
- Sending coupons or information to potential customers near a competitor's business

# Growing Popularity

Percent of Geo-Precise Campaigns  
Using Geo-Conquesting

Top Mobile Ad Categories (Q2 2013)		Top Geo-Conquesting Ad Categories (Q2 2013)	
1	Financial Services/Insurance	1	Restaurants
2	Telecommunications	2	Retail
3	Restaurants	3	Financial Services/Insurance
4	Retail	4	Travel
5	Auto	5	Gas & Convenience

# Highly Effective?

- Geo-conquesting delivered high coupon redemption:
  - Dunkin': 3.6%
  - Dept. store: 2%
- Need an experiment to isolate targeting effects

saturation effects

low targeting value

threshold effects

← Focal Neutral Competitive →

# Predictions

---

- Competitive locational targeting works!
  - Show by varying location and timing
- Switching costs shift reservation values
  - Concave discount sensitivity near focal firm
  - Convex discount sensitivity near competitor

# Our Empirical Setting: Movie Tickets

---

- Demand is context-sensitive
- Differentiated mainly by location
- No resale or storage
- Sensitive to promotions
- High fixed costs

# Experimental Design

---

- 3
  - Targeting 3 locations
    - Near the focal retailer
    - Near a competitor's location
    - Similarly trafficked neutral location
  - Offer timing: now or same time next week
  - Random assignment of promotion depth
    - e.g. 20% , 40% , 60% discount

Selection on other factors?  
Similar customer characteristics

Focal  
Location

Neutral  
Location

Competitive  
Location

2.4 miles (4 km)

# Experimental Design

---

3

- Targeting 3 locations
  - Near the focal retailer
  - Near a competitor's location
  - Similarly trafficked neutral location

Targeting effect to be measured against within-sample baseline

× 2

- Offer timing: now or same time next week

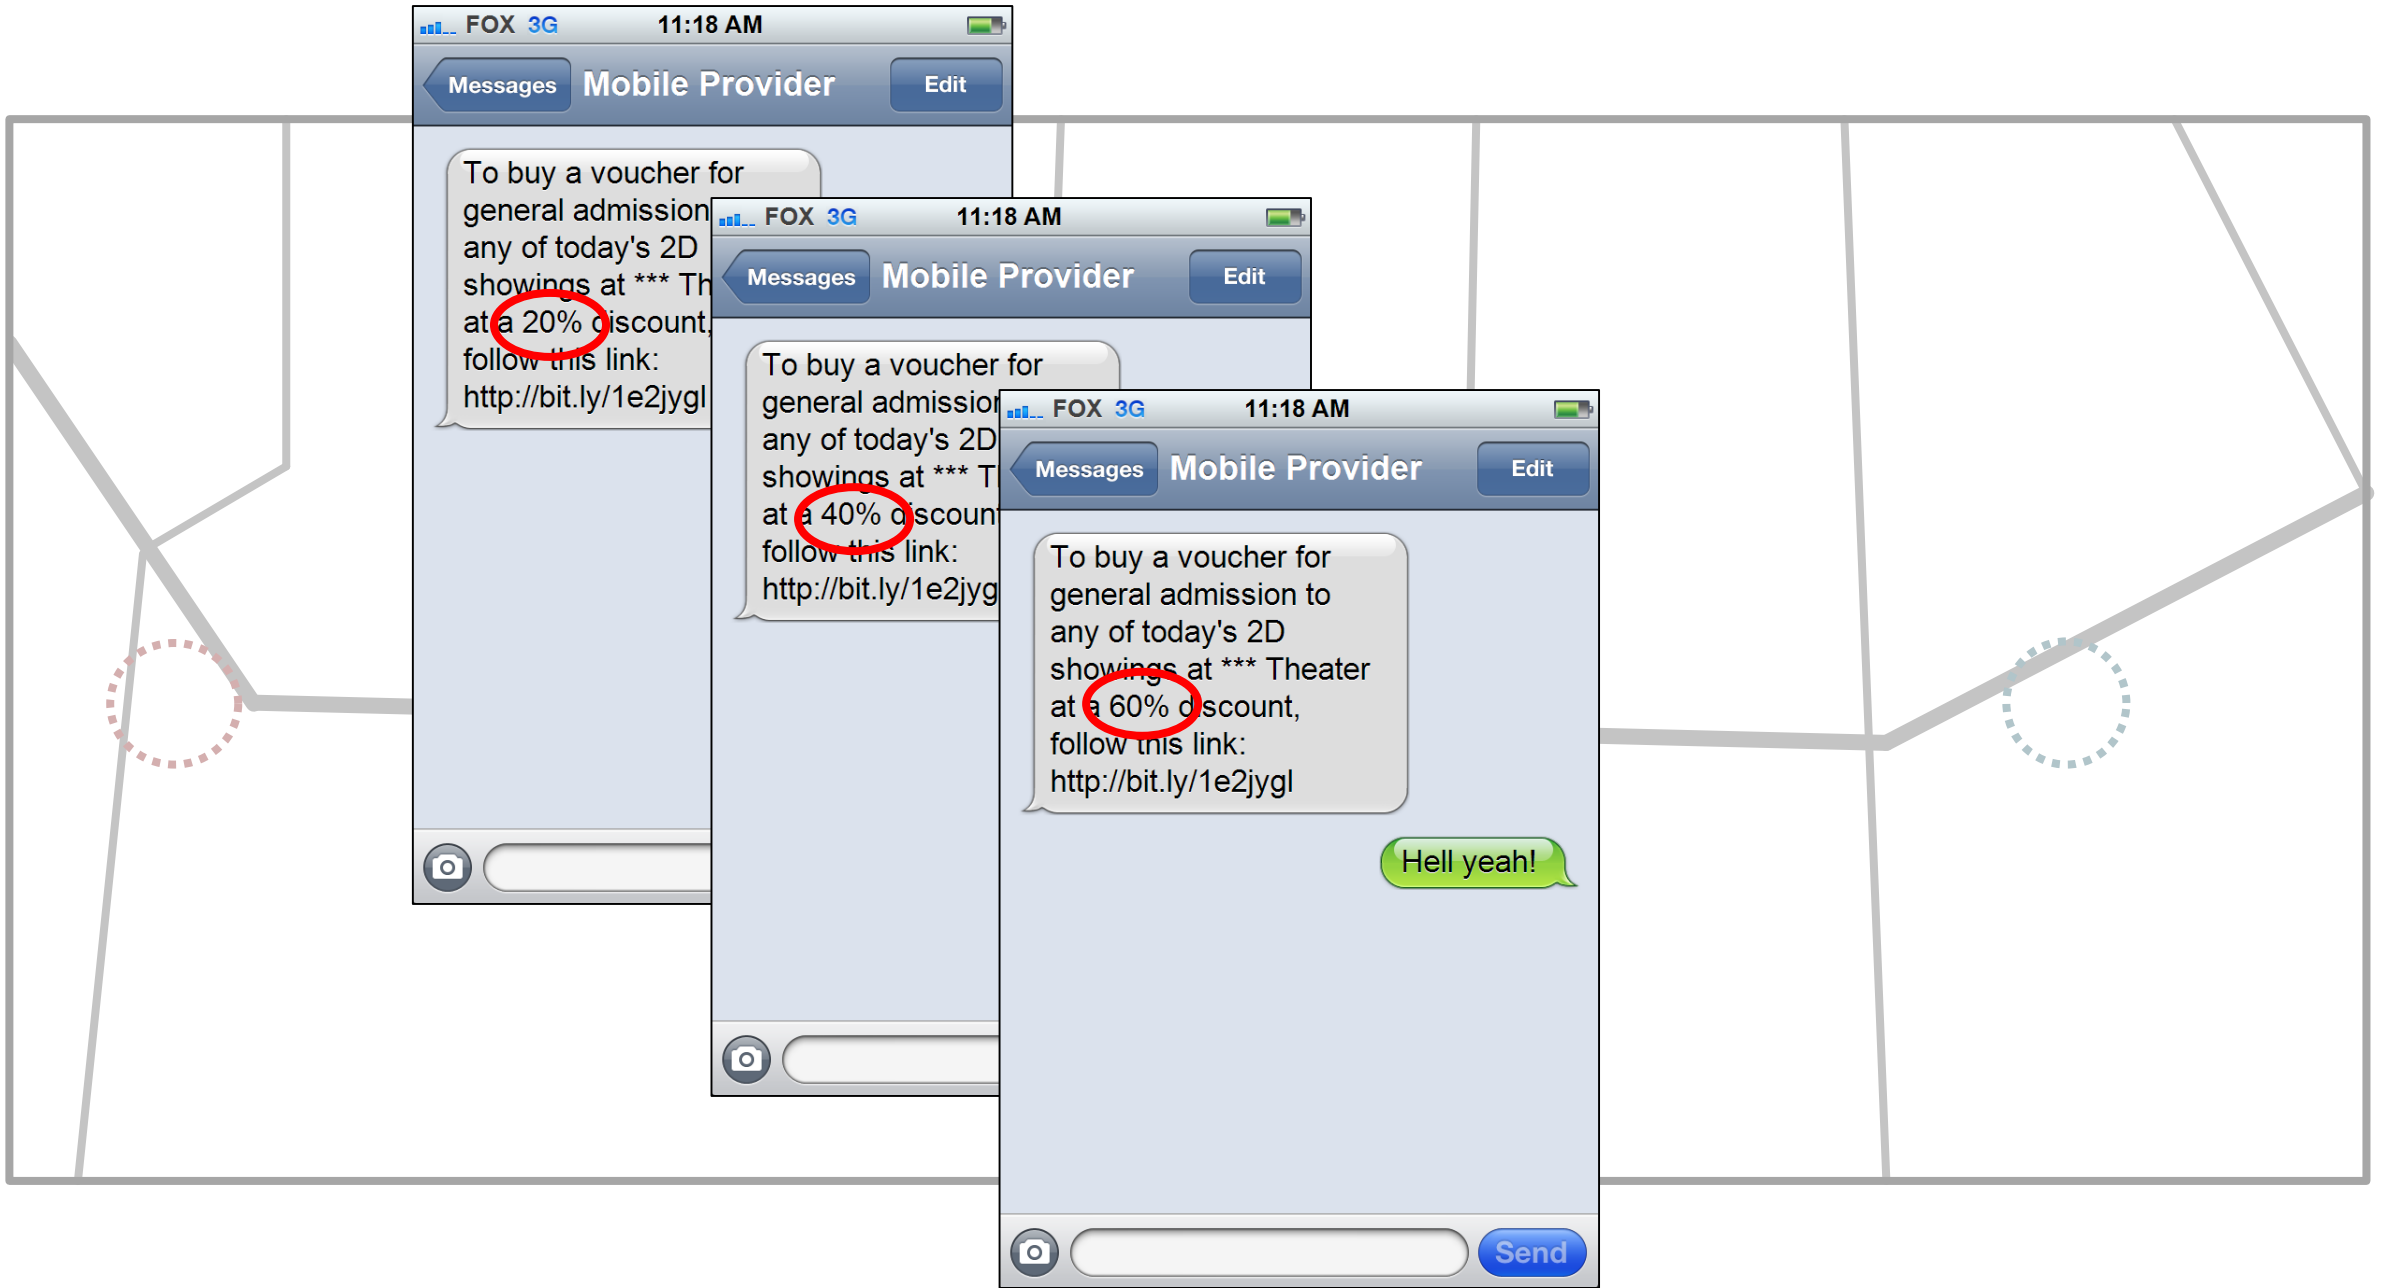

Randomized non-targeted group identifies real-time effect

- Random assignment of promotion depth
  - e.g. 20% , 40% , 60% discount

# Experimental Design

---

- 3
  - Targeting 3 locations
    - Near the focal retailer
    - Near a competitor's location
    - Similarly trafficked neutral location
- × 2
  - Offer timing: now or same time next week
- × 3
  - Random assignment of promotion depth
    - e.g. 20% , 40% , 60% discount

# Experimental Design

---

3

- Targeting 3 locations
  - Near the focal retailer
  - Near a competitor's location
  - Similarly trafficked neutral location

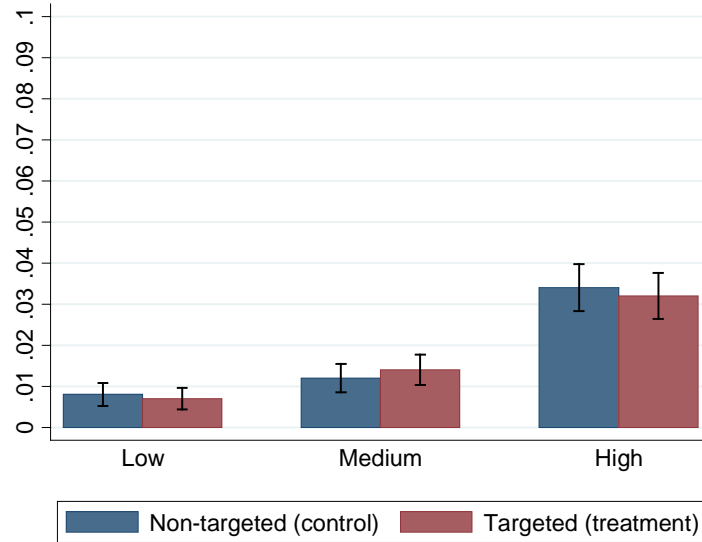

N = 1,000 per cell  
(18,000 total)

× 2

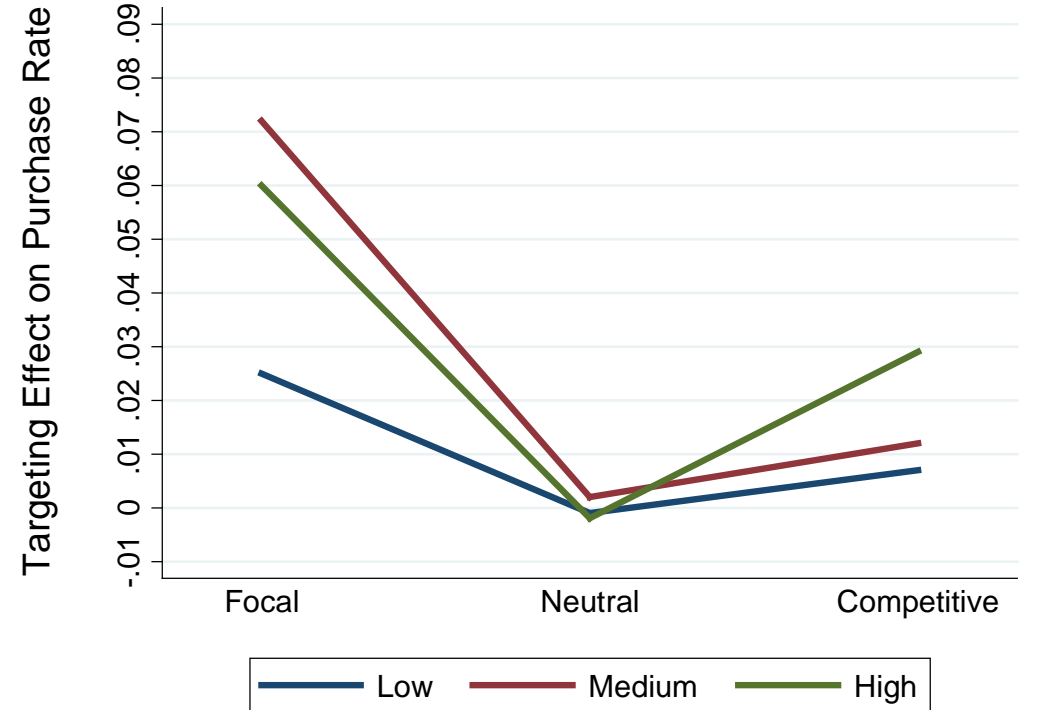

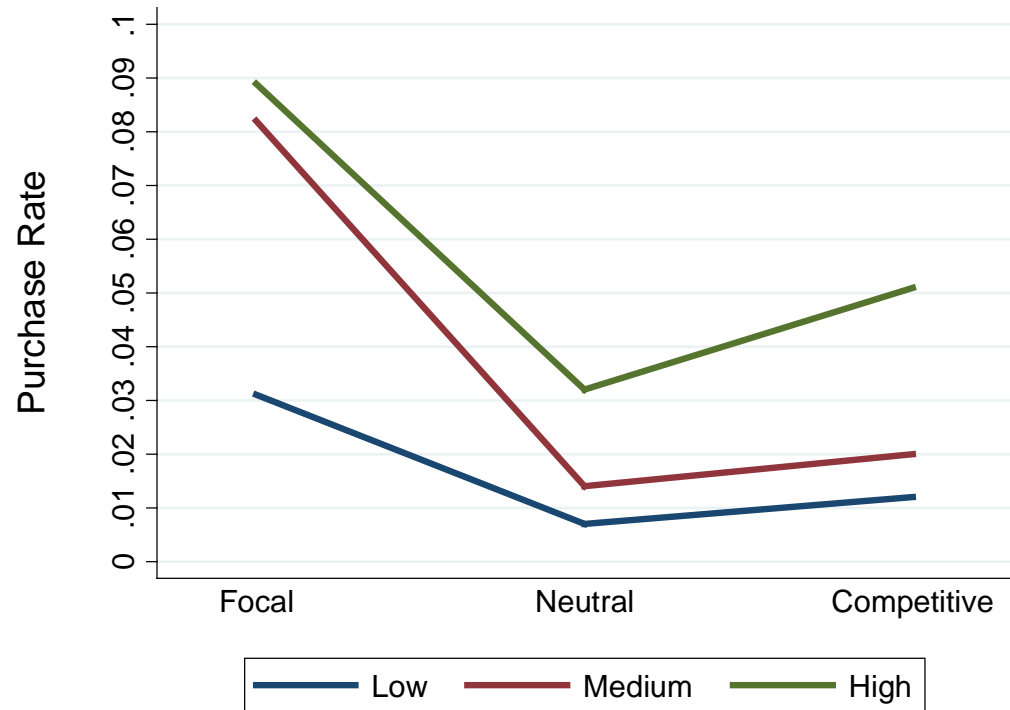

- Offer timing: now or same time next week

× 3

- Random assignment of promotion depth
  - e.g. 20% , 40% , 60% discount

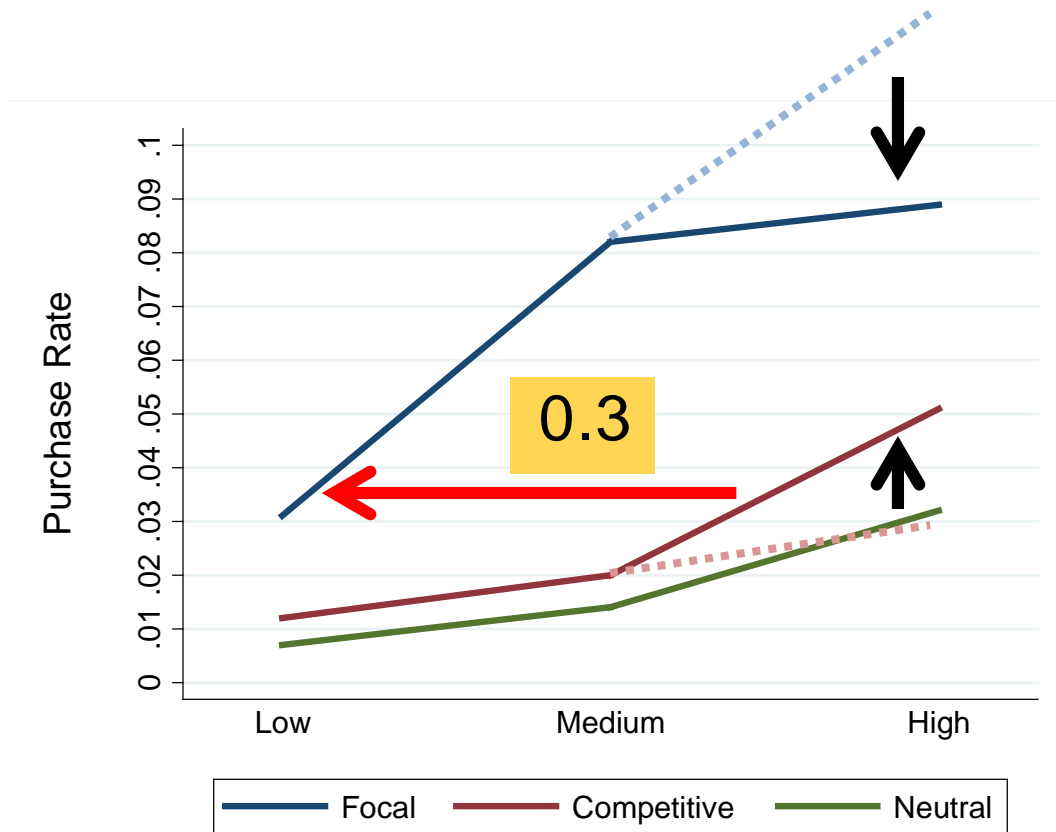

# J-shaped Response to Location

# Discount Response Curves

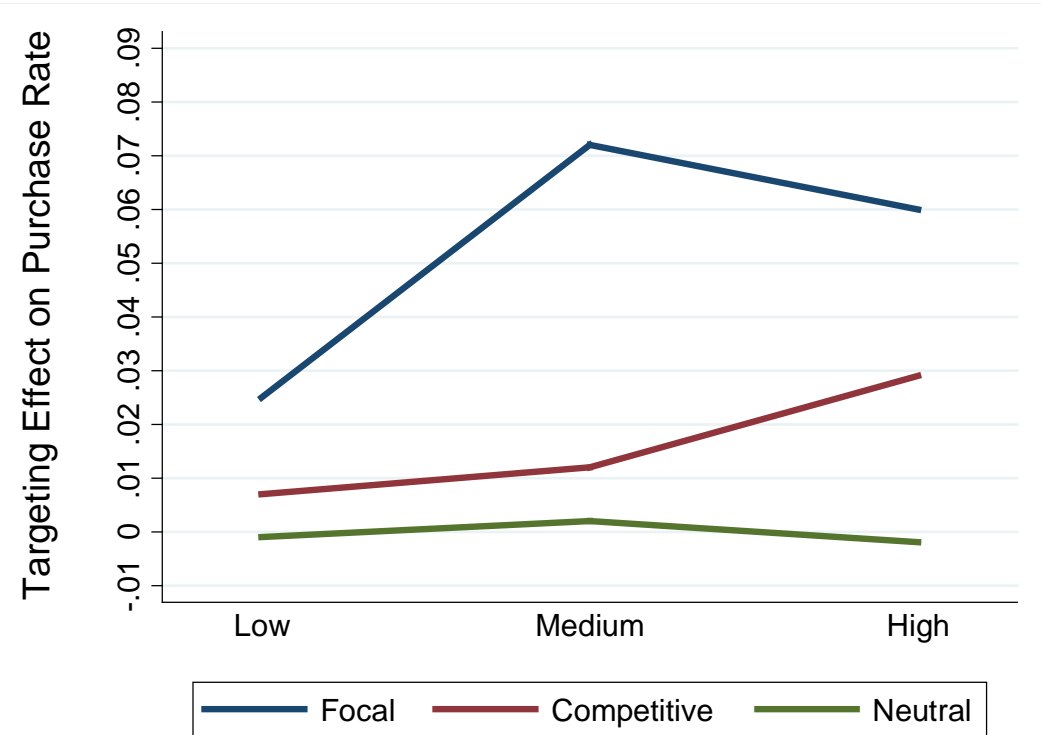

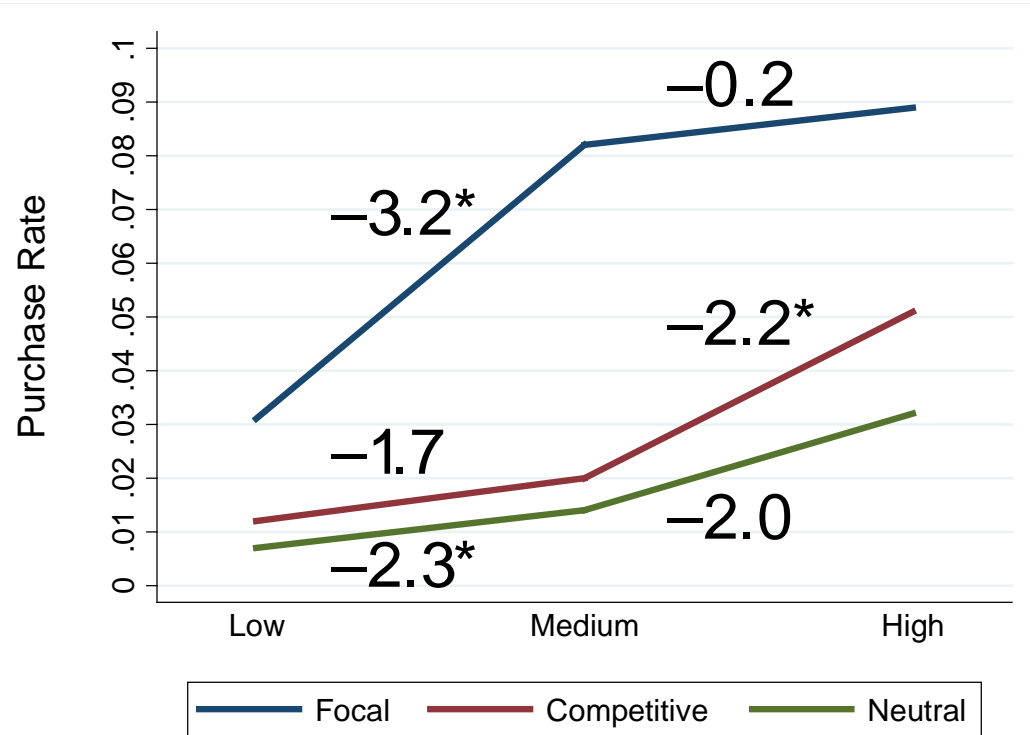

Competitive targeting: higher marginal effects for deep discounts

# Revenue Maximizing Discounts

Estimates monetary value of locational targeting

# Promotional Elasticities

# Testing for Concavity/Convexity

	Focal	Competitive	Neutral
High	8.9%	5.1%	3.2%
Medium	8.2%	2.0%	1.4%
Low	3.1%	1.2%	0.7%
High – Medium	0.7%	3.1% **	1.8% **
Medium – Low	5.1% **	0.8%	0.7%
Diff-in-diff	-4.4% **	2.3% *	1.1%
Diff-in-diff-in-diff	6.7% **		

# Limitations and Extensions

---

- Strategic response
  - Competitive response
  - Customer response
- Effectiveness in other categories?
  - Context very important (retail, restaurants)
  - Need multivariate design

# Conclusions

---

- Investigates an emerging tactic using mobile
  - Attribution to locational targeting
  - Effective third-degree price discrimination
- Indication of mobile's impact on competition
  - Incentive to go on offensive
  - Testing and measurement offline
